Notes: Alice Springs tour 21 to 26 April 2013

With Central Australia enduring one of the hottest and driest summers on record, it is a wonder there's any birds left in the red centre. Having been out scouting pre-tour for grey honeyeater without a squeak from it or anything much, I declared to the group at dinner that Julia Gillard had more chance of being the Prime Minister after the September election than us finding a **grey honeyeater** the next day. As it turned out, we didn't have too much trouble finding that species, and indeed, couldn't shake it off, so that augers well for Julia! Other sought-after species seen during the tour included two pairs of **dusky grasswren**, a pair of **rufous-crowned emu-wren**, one **spinifex pigeon**, a **diamond dove**, a **black-breasted buzzard**, a **black falcon**, about ten **slaty-backed thornbills**, a pair of **banded whiteface** in company with **southern whitefaces**, around eight **black-chinned honeyeaters**, thirty or so **orange chats** and roughly eight **chiming wedgebill**. A single **spinifexbird** was heard but not seen.

Much to Trisha's chagrin, PowerWater in Alice Springs had run out of keys to the waste treatment plant, so even though we had the access permits, we didn't have a key. Will, a birder from Alice Springs generously came to our rescue Thanks to local birders, Lisa and Chris, for their kind offers to also assist us. Accompanied by Will, we had a productive couple of hours, getting long-toed stint, red-necked stint, black-tailed godwit, curlew sandpiper, wood sandpiper, common sandpiper, marsh sandpiper, sharp-tailed sandpiper plus three freckled ducks, as well as orange chats and a black falcon.

Other highlights included three **peregrine falcons**, three **spotted harriers** and a few small flocks of **budgerigars**.

There was a dearth of domestic migratory or nomadic species, with **rufous songlark** and budgies being the only species of that ilk seen. Amazingly, not a single pardalote of either species was seen or heard.

We spotlighted a superb **centralian knob-tailed gecko** near Glen Helen, and at Ormiston Gorge a feisty **long-nosed dragon** bailed us up.

The extremely dry conditions were evident in several skinny dingoes seen and even feral cats, which had bred up during the 2011 mouse plague, were looking the worst for wear.

Not the easiest birding tour I've ever led but David, Jeannie and Judith were always good humoured. Weather was great, mostly high 20s, with only one day at 37°C. Casa Nostra remains a favourite restaurant with a vanilla slice second to none; and we found a little piece of SE Asia in Alice Vietnamese Restaurant, about 15 km out of town.
